

## PRESS RELEASE

### Czech And Korean Battery Ecosystem Agencies Join Their Forces

**Prague, 20<sup>th</sup> September 2024.** The Czech Battery Cluster (CBC), Brno University of Technology (BUT) and the Korea Planning & Evaluation Institute of Industrial Technology (KEIT) and Korea Electronics Technology Institute (KETI) organizations signed today a memorandum of understanding.

The scope of the MoU is their joint future cooperation in the field of collaboration and cooperative activities in industrial battery technology R&D, including propositions and planning of programs and projects in education of human resources.

Possible future cooperation within potential projects will be beneficial to all organizations that are active in different parts of the battery value chain both in the Czech and South Korea Republics. The following months will bring further meetings which will provide for concrete outcomes. Stay tuned for the news.
